WINEMAKING INFORMATION

PRE-FERMENTATION PROCEDURES: Grape bunches are **hand-sorted** on a **vibrant table** and **chilled** with carbonic snow to **avoid oxidation** and reduce considerably the use of **sulphur**. After **destemming**, berries are **hand-sorted** on a second vibrant table. A part undergo to a **whole berries** fermentation and the other part is **softly crushed**.

This process is "100% screw conveyor free" to handle grapes as **gently** as possible.

FERMENTATION PROCESS: The **fermentation** is realised in stainless steel vats at **controlled temperature**. The **maceration** is **medium acting** using **délestage** and, partially, **submerged cap** technique for over **18 days**.

OAK REFINING: The ageing of **12 months** is made in **medium size oak casks** (2500-4000 litres) and oak vats (5500 litri).

THE DIFFERENCE IS...

PICOTENER, is the "**forgotten Nebbiolo**" nowadays almost **impossible to find**. In fact, this **ancient sub-variety** is characterized by **low production yield** and **vegetative vigour**. For this reason, it has been rarely planted. Enrico Serafino **proudly** propose this **PICOTENER rich in anthocyanins (red-colored polyphenols)** with a surprisingly **intense** colour and a **very spicy** aroma.

VINTAGE 2018

The 2018 vintage opened with a long winter extended until March, with plenty of rainfall, restoring the soil's water supply. Flowering and subsequent berry set took place regularly and in optimal climatic conditions. Green harvesting became necessary for nearly all varieties in order to curb production. Development was gradual during the summer; a long period of constant fine weather helped the grapes to ripen without the harvest needing to be brought forward. It has been a vintage that demanded the attention of winegrowers in their management of the vineyard achieving the best results possible.
